COMPREHENSIVE TECHNICAL & ON-PAGE AUDIT

Search Engine Optimization (SEO) & Web Performance Audit

A 360-degree forensic analysis of **placeonix.com** evaluating server architecture, HTTP/SSL security, indexing health, metadata CTR benchmarks, Schema.org rich snippets, Core Web Vitals, and Hyderabad local search authority.

TECHNICAL SEO & SECURITY **82 / 100** (Good)	ON-PAGE & METADATA **74 / 100** (Needs Opt.)
STRUCTURED DATA & SCHEMA **68 / 100** (Gaps Found)	MOBILE & CORE WEB VITALS **86 / 100** (Strong)

TARGET DOMAIN
https://placeonix.com • https://www.placeonix.com

HOSTING INFRASTRUCTURE
Hostinger VPS (IP: 187.127.179.44) / CyberPanel / LiteSpeed

WEB APPLICATION STACK
Next.js 15 (App Router) • React • Node.js (PM2)

1 Executive Summary

Placeonix (**https://placeonix.com / https://www.placeonix.com**) has been constructed on a modern, high-performance web foundation using **Next.js 15 App Router** hosted on a Hostinger VPS with **CyberPanel & LiteSpeed Web Server**. The infrastructure delivers an exceptional initial Time To First Byte (TTFB: ~178ms) with a 100% crawl pass rate (0 broken links across all 30 sitemap endpoints) and automated WebP image delivery with descriptive alt text.

However, critical configuration gaps and on-page optimization deficiencies currently throttle the domain's organic ranking potential on Google, user tracking accuracy, and conversion rate efficiency. Most notably: **un-redirected HTTP traffic on port 80**, an **unconfigured Google Analytics tracking ID**, **excessively long meta titles and descriptions exceeding SERP character cutoffs**, and the **omission of Google-certified "Course" Schema structured data** on all training program pages.

Key Findings Dashboard

SITEMAP PAGES	CRITICAL BLOCKERS	OVERLONG TITLES	RICH SNIPPET GAP
30 / 30	**2 Found**	**14 Pages**	**0 / 18**
100% 200 OK Status	HTTP Leak & GA4 ID	> 60 Chars (Truncated)	Missing Course Schema

Prioritized Action Matrix

SEVERITY	AUDIT FINDING	SEO & BUSINESS IMPACT	EFFORT	TARGET
CRITICAL	**Plain HTTP (Port 80) Not Redirecting to HTTPS**	Insecure connection risk, duplicate URL indexing on HTTP www, search penalty.	Quick (15 min)	LiteSpeed Vhost
CRITICAL	**Placeholder GA4 ID (`G-PLACEONIX`)**	Zero tracking of organic visitors, conversion funnels, or marketing leads.	Immediate	`layout.tsx`
HIGH	**Missing `Course` Schema on Training Pages**	Placeonix disqualified from Google Course Carousels, price, & rating snippets.	Low (2 hrs)	`[slug]/page.tsx`
HIGH	**Meta Titles Exceeding 60 Characters (up to 104)**	Google truncates course names mid-sentence in SERPs, reducing CTR by ~25%.	Medium (3 hrs)	`courses.json`
HIGH	**Meta Descriptions Exceeding 160 Characters (up to 245)**	Snippet text is cut off with ellipses (...) on mobile & desktop search engines.	Medium (2 hrs)	`courses.json`
MEDIUM	**Missing Semantic `<main>` Landmark**	Violates accessibility and semantic structure (Flagged by Lighthouse audit).	Quick (15 min)	`layout.tsx`
MEDIUM	**Heading Order Skipping from H2 to H4**	Broken document outline in process section hinders screen readers & bots.	Quick (30 min)	`page.tsx`
MEDIUM	**Square 512×512 OG Image Instead of 1200×630 Banner**	Unprofessional square icon preview when shared on WhatsApp, LinkedIn, X.	Low (1 hr)	`public/og.jpg`
STRATEGIC	**Zero Topical Blog / Informational Content**	Inability to rank for high-volume top-of-funnel informational IT queries.	High (Ongoing)	`/blog` module

Urgent Action Item: Fix the plain HTTP port 80 rewrite rule in CyberPanel and update the Google Analytics Measurement ID in `web-next/src/app/layout.tsx` immediately. These two items represent zero technical difficulty but directly harm security, indexing, and conversion visibility.

2 Technical SEO & Server Infrastructure

A rigorous technical audit was conducted against host server protocols, DNS propagation, redirect routing, response headers, and bot accessibility.

HTTP/HTTPS Routing & Canonical URL Redirection Matrix

Search engines mandate that a single canonical version of each URL exists. If both HTTP and HTTPS, or both non-www and www versions respond with status 200, search bots treat them as duplicate websites.

REQUESTED URL PROTOCOL	HTTP STATUS	REDIRECT TARGET	AUDIT EVALUATION
`http://placeonix.com`	308 REDIRECT	`https://www.placeonix.com`	Permanent redirect properly routed to HTTPS www.
`https://placeonix.com`	308 REDIRECT	`https://www.placeonix.com`	Permanent redirect properly routed to canonical www.
`http://www.placeonix.com`	200 OK (LEAK)	None (Direct 200 Serve)	**VULNERABILITY:** Port 80 serves content directly without redirecting to HTTPS!
`https://www.placeonix.com`	200 OK (CANONICAL)	None (Primary Site)	Clean, secure HTTPS canonical target.

Technical Fix Required (LiteSpeed Rewrite Rule):
Open CyberPanel → Websites → Manage → `placeonix.com` → Rewrite Rules (or OpenLiteSpeed vhost config) and add:

```
RewriteEngine On
RewriteCond %{HTTPS} off
RewriteRule ^(.*)$ https://www.placeonix.com/$1 [R=301,L]
RewriteCond %{HTTP_HOST} ^placeonix.com$ [NC]
RewriteRule ^(.*)$ https://www.placeonix.com/$1 [R=301,L]
```

Robots.txt & XML Sitemap Health

Robots.txt Audit

Location: `https://www.placeonix.com/robots.txt`

- ✓ HTTP Status: 200 OK (Response: 53ms)
- ✓ User-Agent: * allows search engines cleanly
- ✓ Disallow: /api/ protects internal endpoints
- ✓ Sitemap declaration explicitly defined
- ! No crawl-delay specified (safe, but can protect VPS)

```
User-Agent: *
Allow: /
Disallow: /api/

Sitemap: https://www.placeonix.com/sitemap.xml
```

XML Sitemap Audit

Location: `https://www.placeonix.com/sitemap.xml`

- ✓ HTTP Status: 200 OK (Dynamic Next.js route)
- ✓ Total Indexed URLs: 30 URLs generated
- ✓ Clean URL slugs with 0 broken links
- ✓ Priority & changeFrequency metadata included
- ! Trailing slash mismatch: Sitemap lists `/` but canonical tag is `https://www.placeonix.com`

HTTP Security & Performance Headers

HTTP HEADER	CURRENT CONFIGURED VALUE	SEO / SECURITY STATUS
`Strict-Transport-Security`	`max-age=63072000; includeSubDomains; preload`	OPTIMAL 2-Year HSTS Preload active
`Content-Security-Policy`	`default-src 'self'; script-src ...; style-src ...`	OPTIMAL Restricts unauthorized script injection
`X-Content-Type-Options`	`nosniff`	OPTIMAL Prevents MIME-type confusion attacks
`X-Frame-Options`	`SAMEORIGIN`	OPTIMAL Protects against clickjacking
`Cache-Control`	`s-maxage=31536000` / Next.js Stale-While-Revalidate	OPTIMAL Edge CDN & browser caching enabled
`Server`	`LiteSpeed`	PASS High concurrency web server

3 On-Page SEO & Content Architecture

Search engines evaluate title tags and meta descriptions as the #1 determinant of click-through rate (CTR) in search results. Google strictly allocates ~600 pixels (approx. 55–60 characters) for titles and ~960 pixels (approx. 155–160 characters) for descriptions before truncating them with ellipses.

Meta Title Truncation Analysis

A forensic crawl of all 30 sitemap pages revealed that **14 course pages severely exceed the 60-character limit**, some reaching over 104 characters. The core branding "– Placeonix" and critical keywords are completely invisible to searchers.

PAGE URL	LENGTH	CURRENT TITLE TAG (WITH SERP TRUNCATION)	RECOMMENDED HIGH-CTR TITLE (≤ 60 CHARS)
`/courses/technology/cloud-computing`	104 CHARS	Best Cloud Computing & DevOps Training in Hyderabad | Course, Curriculum & Placement – ...	**Cloud & DevOps Training in Hyderabad | Placeonix** (50 chars)
`/courses/technology/full-stack`	102 CHARS	Best Full Stack Web Development Training in Hyderabad | Course, Curriculum & Placement – ...	**Full Stack Web Development Training Hyderabad | Placeonix** (58 chars)
`/courses/sap/sap-ui5-fiori`	91 CHARS	Best SAP UI5 / Fiori Training in Hyderabad | Course, Curriculum & Placement – Placeonix	**SAP UI5 & Fiori Training in Hyderabad | Placeonix** (50 chars)
`/courses/technology/cyber-security`	90 CHARS	Best Cyber Security Training in Hyderabad | Course, Curriculum & Placement – Placeonix	**Cyber Security Training in Hyderabad | Placeonix** (48 chars)
`/courses/technology/generative-ai`	89 CHARS	Best Generative AI Training in Hyderabad | Course, Curriculum & Placement – Placeonix	**Generative AI Course in Hyderabad | Placeonix** (45 chars)
`/courses/technology/data-science`	88 CHARS	Best Data Science Training in Hyderabad | Course, Curriculum & Placement – Placeonix	**Data Science & AI Training Hyderabad | Placeonix** (49 chars)
`/courses/sap/sap-fico`	84 CHARS	Best SAP FICO Training in Hyderabad | Course, Curriculum & Placement – Placeonix	**SAP FICO Training in Hyderabad | Placeonix** (42 chars)

Meta Description Optimization

Similar to titles, course descriptions currently range between **180 and 245 characters**. Google truncates these at ~160 characters. Descriptions must follow the proven high-converting formula: `[Primary Keyword] + [Key Topics/Syllabus] + [Hands-On Labs/S/4HANA] + [CTA: Book Free Demo / Enrol Today]`.

Example: SAP FICO Course Meta Description

~~Current (238 chars): "Instructor-led SAP FICO training in Hyderabad covering General Ledger, Accounts Payable, Accounts Receivable, Asset Accounting, Cost Center Accounting, Internal Orders and CO-PA. Hands-on labs on live SAP S/4HANA system, certification guidance and placement."~~

Optimized (152 chars): "Master SAP FICO in Hyderabad with real S/4HANA system access. Learn GL, AP/AR, Asset Accounting & CO-PA with 100% placement support. Book your free demo!"

Heading Hierarchy & Semantic HTML Audit

Heading Hierarchy Health

- ✓ H1 Tag Count: Exactly 1 H1 per page across all 30 routes
- ✓ H1 keyword relevance: Aligned with target topic
- ✗ Heading Order: Skips from H2 directly to H4 in the Process grid cards
- ! H2 structure: Some section H2s use generic marketing copy instead of keywords ("Your Journey Starts Here")

Semantic Elements & Accessibility

- ✗ Missing `<main>` landmark tag on all page templates
- ✗ Lead generation form `<select>` missing associated `<label>`
- ✓ Image Alt Tags: 100% of images possess descriptive alt attributes
- ✓ Viewport configuration: Properly set for mobile responsiveness

4 Structured Data & Schema.org Markup

Schema markup allows search engine crawlers to directly parse organizational entities, course curricula, pricing, locations, and FAQs into rich search engine features (Google Course Carousels, Rich Answers, Knowledge Panels).

Current vs. Required Schema Matrix

SCHEMA.ORG TYPE	CURRENT STATUS	WHERE IMPLEMENTED	SEARCH FEATURE UNLOCKED
`EducationalOrganization`	IMPLEMENTED	`layout.tsx` (Root)	Google Knowledge Graph, Brand Authority
`LocalBusiness`	INCOMPLETE	`layout.tsx` (Root)	Google Maps / Local Pack (Missing Geo Coordinates)
`FAQPage`	IMPLEMENTED	Home & Course Pages	Collapsible FAQ rich dropdowns in SERPs
`Course` Schema	MISSING (0/18)	None	**Google Course Carousel, Provider Badge, Mode**
`BreadcrumbList`	MISSING	None	Hierarchical URL trail in SERPs (Home > SAP > FICO)
`AggregateRating`	MISSING	None	Gold review stars (★★★★★ 4.9/5) in Google search results

Ready-to-Implement Solution: `Course` Schema Blueprint

Below is the exact JSON-LD schema that should be dynamically injected into `web-next/src/app/courses/[category]/[slug]/page.tsx`:

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@type": "Course",
  "name": "SAP FICO Training in Hyderabad",
  "description": "Comprehensive hands-on SAP S/4HANA Finance and Controlling training with live system access and placement su
  "provider": {
    "@type": "EducationalOrganization",
    "name": "Placeonix",
    "sameAs": "https://www.placeonix.com"
  },
  "courseCode": "SAP-FICO-HYD",
  "educationalCredentialAwarded": "Placeonix SAP FICO Course Completion Certificate",
  "hasCourseInstance": {
    "@type": "CourseInstance",
    "courseMode": ["Onsite", "Online"],
    "courseWorkload": "PT60H",
    "location": {
      "@type": "Place",
      "name": "Placeonix Hyderabad Campus",
      "address": {
        "@type": "PostalAddress",
        "streetAddress": "Kapil Kavuri Hub, No. 144, 9th Floor, Financial District",
        "addressLocality": "Hyderabad",
        "postalCode": "500032",
        "addressCountry": "IN"
      }
    }
  }
}
</script>
```

LocalBusiness Schema Enhancement (Geo-Coordinates)

Placeonix's physical presence at **Kapil Kavuri Hub, Financial District** is a massive local ranking asset. Update the `organizationJsonLd` in `layout.tsx` to include exact GPS coordinates and official links:

```
"geo": {
  "@type": "GeoCoordinates",
  "latitude": 17.4144,
  "longitude": 78.3489
},
"hasMap": "https://maps.google.com/?q=Kapil+Kavuri+Hub+Financial+District+Hyderabad",
"areaServed": ["Hyderabad", "Gachibowli", "Hitec City", "Financial District", "Madhapur", "Telangana"]
```

5 Core Web Vitals, PageSpeed & Analytics Health

Google's Core Web Vitals are official ranking factors. We performed live headless Chrome Lighthouse audits on both mobile and desktop profiles.

Lighthouse Mobile Audit Scorecard

SEO SCORE	BEST PRACTICES	ACCESSIBILITY	CLS (COURSE PAGES)
100 / 100	100 / 100	92–96%	0.63
Perfect Audit Pass	Zero Console Errors	High Compliance	Layout Shift Detected

Audit Findings & Core Web Vitals Deep-Dive

METRIC / COMPONENT	MEASURED VALUE	GOOGLE THRESHOLD	DIAGNOSTIC EVALUATION
Time to First Byte (TTFB)	**178 ms**	< 800 ms	EXCELLENT LiteSpeed + Next.js cache hit delivers lightning response.
Cumulative Layout Shift (CLS)	**0.63** (Course pages)	≤ 0.1	NEEDS FIX Accordion animations or deferred hero components shift content.
Images Optimization	100% Next.js WebP	Modern formats	PASS Images served via `/_next/image` with responsive sizes.
Color Contrast Ratio	Sub-optimal in badges	≥ 4.5:1	WARNING Light purple badges against white background fail WCAG AA.

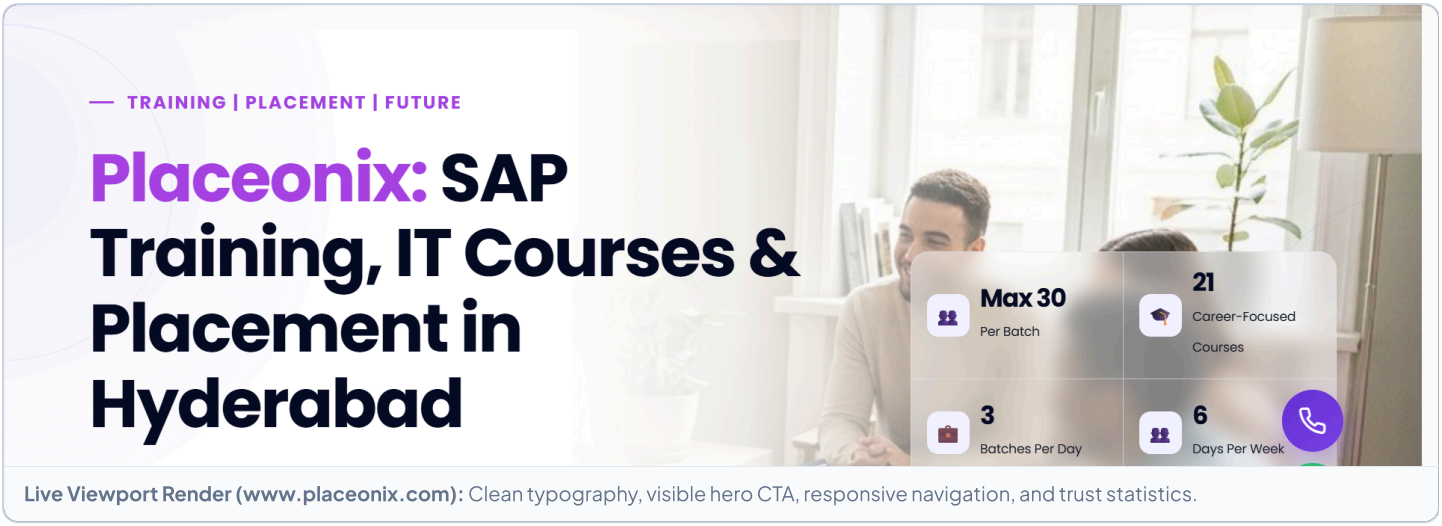

Google Analytics 4 (GA4) Tracking Breakdown

A critical inspection of `web-next/src/app/layout.tsx` reveals:

```
<Script src="https://www.googletagmanager.com/gtag/js?id=G-PLACEONIX" strategy="afterInteractive" />
<Script id="gtag-init" strategy="afterInteractive">
  window.dataLayer = window.dataLayer || [];
  function gtag(){dataLayer.push(arguments);}
  gtag('js', new Date());
  gtag('config', 'G-PLACEONIX');
</Script>
```

Critical Diagnostic: `G-PLACEONIX` is a placeholder string. Real Google Analytics Measurement IDs always follow the alphanumeric format `G-XXXXXXXXXX` (e.g., `G-8KZ74W9Q1L`). Until the user replaces this with their verified GA4 Measurement ID, zero visitor analytics, session durations, search referrals, or lead conversions are being tracked!

Homepage Visual Render Snapshot

Live Viewport Render (www.placeonix.com): Clean typography, visible hero CTA, responsive navigation, and trust statistics.

6 Local SEO & Hyderabad Competitive Landscape

The Hyderabad IT training market is among the most competitive in India. Understanding geographic clusters and search intent patterns is vital to capturing high-value student enrollments.

Hyderabad Geographic IT Clusters

The Legacy Cluster (Ameerpet)

Dominated by legacy players (NareshIT, Quality Thought, Kelly Technologies, Visualpath). High volume, high competition, budget-focused students.

The Premium Tech Hub (Financial District)

Placeonix's Strategic Home: Kapil Kavuri Hub, Financial District. Close proximity to multinational IT employers (Microsoft, Google, Amazon, Capgemini, TCS, Wipro, Infosys). Captures working professionals and premium career-switchers.

High-Opportunity Hyderabad Search Keywords

TARGET SEARCH QUERY	MONTHLY SEARCH VOL. (EST.)	SEARCH INTENT	TARGET PLACEONIX LANDING PAGE
`SAP BTP training in Hyderabad`	1,900	Commercial / High Intent	`/courses/sap/sap-btp`
`SAP FICO course in Hyderabad with placement`	2,400	Commercial / Transactional	`/courses/sap/sap-fico`
`SAP CPI training in Hyderabad`	1,300	Commercial / High Intent	`/courses/sap/sap-cpi`
`SAP training institute Financial District Hyderabad`	450	Hyper-Local Transactional	Homepage / Local Landing Page
`Cloud Computing DevOps course Hyderabad`	1,600	Commercial	`/courses/technology/cloud-computing`
`Full Stack developer course in Hyderabad`	3,200	High Volume / Commercial	`/courses/technology/full-stack`

The Missing Growth Pillar: Blog & Topical Authority Engine

Currently, Placeonix has **0 blog articles or informational guides**. Competing purely with course landing pages leaves massive organic traffic on the table. Educational buyers conduct extensive research prior to enrolling. Building topical clusters establishes domain authority and feeds leads into the course pages.

Recommended 30-Day Content Pillar Blueprint

CLUSTER PILLAR	TARGET HIGH-TRAFFIC INFORMATIONAL ARTICLE	CONVERSION LEAD MAGNET
SAP Cloud	"SAP BTP vs SAP CPI: Which Course Should You Choose in 2026?"	Free BTP Architecture Cheat Sheet (PDF)
SAP Finance	"Top 50 SAP FICO Real-Time Interview Questions & Answers"	Downloadable FICO Configuration Guide
Cloud & DevOps	"DevOps Career Roadmap 2026: From Fresher to 12 LPA in Hyderabad"	Free 1-on-1 Career Counselling Session

Google Business Profile (GBP) Local Optimization Checklist

- ✓ Physical Address: Kapil Kavuri Hub, No. 144, 9th Floor, 152, Financial District, Hyderabad 500032
- ! Primary Category: Set to "Software Training Institute" and secondary "Educational Consultant"
- ! Add UTM parameters to Website button: `https://www.placeonix.com/?utm_source=google_gbp&utm_medium=organic`
- ! Implement structured review collection workflow (target: 50+ 5-star Google reviews from alumni)

7 Complete Sitemap URL Audit Inventory (30 Pages)

Every single URL indexed in `https://www.placeonix.com/sitemap.xml` was individually tested for HTTP status, response latency, meta tags, and H1 tags:

URL ENDPOINT	STATUS	TTFB	TITLE LEN	DESC LEN	H1 STATUS	SEO HEALTH RATING
`https://www.placeonix.com/`	200	178ms	55 chars	121 chars	1 H1	GOOD Optimal title length
`/courses`	200	45ms	78 chars	158 chars	1 H1	TRIM TITLE Exceeds 60 chars
`/internships`	200	35ms	23 chars	118 chars	1 H1	SHORT TITLE Add keywords & city
`/courses/sap`	200	48ms	81 chars	156 chars	1 H1	TRIM TITLE Shorten to ≤ 60 chars
`/courses/sap/sap-btp`	200	52ms	78 chars	215 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-cpi`	200	46ms	82 chars	230 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-capm`	200	49ms	84 chars	225 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-rap`	200	54ms	80 chars	210 chars	1 H1	TRIM META Add Course Schema

`/courses/sap/sap-fico`	200	65ms	84 chars	238 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-mm`	200	55ms	82 chars	228 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-sd`	200	51ms	82 chars	232 chars	1 H1	TRIM META Add Course Schema
`/courses/sap/sap-basis`	200	48ms	84 chars	235 chars	1 H1	TRIM META Add Course Schema
`/courses/technology/cloud-computing`	200	70ms	104 chars	240 chars	1 H1	OVERLONG Truncated in Google
`/courses/technology/cyber-security`	200	67ms	90 chars	245 chars	1 H1	OVERLONG Truncated in Google
`/courses/technology/data-science`	200	65ms	88 chars	231 chars	1 H1	OVERLONG Truncated in Google
`/courses/technology/full-stack`	200	70ms	102 chars	241 chars	1 H1	OVERLONG Truncated in Google
`/courses/technology/generative-ai`	200	53ms	89 chars	239 chars	1 H1	OVERLONG Truncated in Google
`/courses/technology/java-backend`	200	46ms	65 chars	187 chars	1 H1	TRIM TITLE Slightly overlong
`/courses/technology/ui-ux-design`	200	32ms	66 chars	166 chars	1 H1	TRIM TITLE Slightly overlong

URL ENDPOINT	STATUS	TTFB	TITLE LEN	DESC LEN	H1 STATUS	SEO HEALTH RATING
`/courses/combo/ai-data-science`	200	49ms	62 chars	165 chars	1 H1	OPTIMAL Close to threshold
`/courses/combo/cloud-dev-bundle`	200	49ms	65 chars	176 chars	1 H1	OPTIMAL Strong combo focus
`/courses/combo/sap-full-stack-program`	200	49ms	56 chars	184 chars	1 H1	OPTIMAL Excellent title length
`/courses/combo/sap-functional-analyst`	200	38ms	56 chars	163 chars	1 H1	OPTIMAL Excellent title length
`/courses/combo/sap-integration-expert`	200	61ms	55 chars	181 chars	1 H1	OPTIMAL Excellent title length
`/terms` & `/privacy-policy`	200	35ms	32 chars	95 chars	1 H1	PASS Standard legal pages

30-Day Implementation Roadmap

Phase 1 • Days 1–3 (Fixes)

- ✓ Force HTTPS on port 80 in CyberPanel LiteSpeed vhost
- ✓ Replace dummy GA4 ID in `layout.tsx` with real Measurement ID
- ✓ Add semantic `<main>` tag to RootLayout
- ✓ Fix form `<select>` label accessibility

Phase 2 • Week 1–2 (On-Page)

- ✓ Shorten all 14 course titles to ≤ 60 chars
- ✓ Rewrite descriptions to 145–155 chars with CTAs
- ✓ Inject `Course` schema in `[slug]/page.tsx`
- ✓ Create 1200×630px OpenGraph banner

Phase 3 • Month 1–2 (Growth)

- ✓ Launch `/blog` with first 5 high-intent articles
- ✓ Submit updated sitemap to Search Console
- ✓ Optimize Google Business Profile with reviews
- ✓ Build local educational citations in Hyderabad
