Technical SEO

Check	Status	Impact	Details
HTTPS / SSL Certificate	PASS	High	Website is secure on HTTPS.
Page Load Speed	PASS	High	Loaded in 0.35s — excellent!
Robots.txt	PASS	Medium	robots.txt is available and accessible.
Canonical Tag	PASS	High	Canonical: https://www.placeonix.com
Mobile Viewport Meta	PASS	High	Viewport: width=device-width, initial-scale=1
URL Structure	PASS	Medium	URL is clean, lowercase and SEO-friendly.
HTTP Status Code	PASS	High	Status 200 OK.
Compression (GZIP/Brotli)	PASS	Medium	Compression enabled: gzip
Cache-Control Header	PASS	Medium	Cache-Control: public, max-age=0, must-revalidate
X-Robots-Tag Header	PASS	Low	No X-Robots-Tag header (default: indexable).

On-Page SEO

Check	Status	Impact	Details
Title Tag	PASS	High	Title (52 chars): "SAP Training in Hyderabad with Placement Placeonix"
Meta Description	FAIL	High	Meta description 245 chars — too long (ideal: 150-160).
H1 Heading Tag	PASS	High	One H1: "Where Talent MeetsOpportunity"
Heading Hierarchy (H2-H4)	PASS	Medium	H2: 8, H3: 7, H4: 18 — good content structure.
Image Alt Attributes	PASS	Medium	All 27 images have alt text — perfect!
Image Dimensions Declared	WARN	Medium	23 image(s) missing width/height — causes layout shift (CLS).
Content Length	PASS	Medium	~1360 words — good content length.

Internal Linking	PASS	Medium	72 internal, 4 external links (0 nofollow).
Broken External Links	WARN	Medium	2 broken external link(s) (checked first 8).
Keyword-Rich Title	PASS	High	Title contains multiple descriptive keywords.

Social & Meta Tags

Check	Status	Impact	Details
Open Graph Tags	PASS	Medium	All 4 OG tags present. og:type="website"
OG Image	PASS	Low	OG image set: https://www.placeonix.com/icon-512.png. Recommended: 1200×630px.
Twitter Card Tags	PASS	Low	Twitter Card: summary. Image: ✓
HTML Language Attribute	PASS	Medium	lang="en" set.
Hreflang Tags	WARN	Low	No hreflang tags. Add if you have multilingual content.
Favicon	PASS	Low	Favicon set: /favicon.png

Content Analysis

Check	Status	Impact	Details
Mixed Content	PASS	Medium	No HTTP resources on HTTPS page — good!
Robots Meta Tag	PASS	Medium	No robots meta tag (default: index, follow).
Total Page Size	FAIL	Medium	Page weight: 2.44 MB — too large!
Paragraph Structure	PASS	Low	37 paragraphs — well structured.
Image Lazy Loading	PASS	Low	3/27 images use lazy loading.

Sitemap Analysis — General / Corporate Website

Check	Status	Impact	Details
Main XML Sitemap	PASS	High	Found at /sitemap.xml — 30 URLs indexed. Required XML sitemap listing all pages
Image Sitemap	WARN	Low	Optional — not found. Optional — for image-heavy sites
Robots.txt Sitemap Declaration	PASS	Medium	1 sitemap(s) declared: https://www.placeonix.com/sitemap.xml

Schema Validation

Check	Status	Impact	Details
Schema: EducationalOrganization	PASS	Low	EducationalOrganization schema found. No strict validation rules defined for this type.
Schema Summary	PASS	Low	1 schema type(s) found: EducationalOrganization

Developer & Performance

Check	Status	Impact	Details
Resource Hints (preload)	PASS	Medium	16 preload tag(s) found — good for critical assets.
DNS-Prefetch / Preconnect	WARN	Low	No preconnect/dns-prefetch hints. Add for Google Fonts, CDNs, analytics.
Script Loading (defer/async)	FAIL	High	10 render-blocking script(s) — hurts Core Web Vitals.
Image Lazy Loading	FAIL	Medium	Only 11% images use lazy loading — hurts LCP/performance.
Modern Image Formats (WebP/AVIF)	FAIL	Medium	No WebP/AVIF images detected — serving unoptimized formats.
HTTP Security Headers	FAIL	High	Only 1/6 security headers — site vulnerable.
Inline Scripts & Styles	FAIL	Low	20 inline scripts — blocks caching and hurts CSP.
Font Display Strategy	PASS	Low	No external font links — system fonts or inline approach used.
Third-Party Scripts	FAIL	Medium	10 third-party scripts — significant performance impact.
Hreflang (International SEO)	WARN	Low	No hreflang tags. Add if site targets multiple countries/languages.
HTTP/2 or HTTP/3	WARN	High	HTTP/2 could not be confirmed. Verify server supports HTTP/2.
Charset & Language Declaration	PASS	Medium	charset declared, lang="en".

Security Audit

Check	Status	Impact	Details
HTTP→HTTPS Redirect	PASS	High	HTTP requests correctly redirect to HTTPS.
HSTS Header	PASS	High	Strict-Transport-Security: max-age=63072000; includeSubDomains; preload
Clickjacking Protection (X-Frame-Options)	WARN	High	Missing X-Frame-Options — site can be embedded in iframes (clickjacking risk).
MIME Sniffing Protection (X-Content-Type-Options)	WARN	Medium	Missing X-Content-Type-Options: nosniff — browser may guess content types (MIME sniffing attack).
Content Security Policy (CSP)	WARN	High	No Content-Security-Policy header — XSS attacks are harder to prevent without CSP.
XSS Protection Header	WARN	Medium	Missing X-XSS-Protection header — older browsers lack built-in XSS filter.
Referrer Policy	WARN	Medium	No Referrer-Policy — full URL may leak to third-party sites when users click links.
Server Header Disclosure	PASS	Low	Server: Vercel — no version info leaked.
Mixed Content	PASS	High	No HTTP resources found on HTTPS page — all assets are secure.
Permissions Policy	WARN	Low	No Permissions-Policy header — browser features (camera, microphone, geolocation) are unrestricted.
Directory Browsing / Listing	PASS	High	Directory listing is disabled — file structure is not exposed.
Sensitive File Exposure	PASS	High	No sensitive files (.env, .git, wp-config, backup.sql etc.) found publicly accessible.
Open Redirect Vulnerability	PASS	High	No open redirect detected on common URL parameters (?url=, ?redirect=, ?next= etc.).

SQL Error Leakage	PASS	High	No SQL error messages found in page — database errors are not exposed.
URL Parameter Injection Risk	PASS	Medium	No high-risk URL parameters detected in the audited URL.
Admin Panel Exposure	PASS	High	No publicly accessible admin panels found on common paths.

Priority Fixes (Errors)

#	Issue	Details
1	Meta Description	Meta description 245 chars — too long (ideal: 150-160).
2	Total Page Size	Page weight: 2.44 MB — too large!
3	Script Loading (defer/async)	10 render-blocking script(s) — hurts Core Web Vitals.
4	Image Lazy Loading	Only 11% images use lazy loading — hurts LCP/performance.
5	Modern Image Formats (WebP/AVIF)	No WebP/AVIF images detected — serving unoptimized formats.
6	HTTP Security Headers	Only 1/6 security headers — site vulnerable.
7	Inline Scripts & Styles	20 inline scripts — blocks caching and hurts CSP.
8	Third-Party Scripts	10 third-party scripts — significant performance impact.
